Legend:

- A case is listed in the above Table either when a positive A-sample has been confirmed during a confirmatory analysis (B-sample) or the Person Responsible has waived his/her right to a B-sample.
- Grade: Under the former FEI Medication Sub-Committee grading system a substance is graded "1" if it has a relative high potential to affect performance of the horse and is graded "5" if it has a relative low potential to affect the performance of the horse. A grade is assigned where the relevant event occurred before 1st June 2006.
- The categories "Doping", "Medication Class A", and "Medication Class B" apply where the relevant event occurred as of 1st June 2006.
