

**PROPOSED RULE CHANGES AND ADDITIONS**  
**Effective 1st January 2008**  
to  
**Rules for Pony Riders & Children**  
**8<sup>th</sup> Edition, effective 1<sup>st</sup> January 2006**

**Approved by FEI Bureau November 2007**

Annex C – I

Measurement Procedure

~~5. The pony must either have all four shoes removed and the feet correctly prepared and balanced as for shoeing, with the wall taken down level with the bearing edge of the sole, or be shod.~~ **A pony must be presented for measurement in the shoes and pads in which he will compete at the competition. Once the competition has begun shoes may not be changed without the written authorisation of the President of the Ground Jury and the FEI Veterinary Delegate. Any shoe change after measurement – either authorised or suspected – may, at the discretion of the Ground Jury, result in a re-measurement of the pony. In the case of the second measurement differing from the first, the higher result will be taken into account. Details of all of the above must be sent with the Official Reports following any event.**

**15.** At the time of measurement, the physical condition of the pony must, in the opinion of the Measuring Veterinarian, be such that the pony is fit to compete. If the pony on presentation to the veterinarian shall in his/her opinion be unfit to be measured for any reason, or present evidence of improper preparation, the owner shall be informed that the pony cannot be measured and therefore cannot participate in the competition.

**19. It is the responsibility of each NF to ensure that any pony measuring over height is not entered at any further international events and that the passport be sent to the FEI within the 15 days immediately following the event at which the measurement was carried out. The fact that the pony has measured out will be marked in the passport and recorded at FEI HQ and the passport will be returned to the NF.**
